Why Hosted Desktop?

In today's world, instant access to all your IT, where ever you are is everything. Businesses are becoming more mobile and need IT solutions that keep up with the pace of business.

The benefits of a Hosted Desktop are far more than simply improving business productivity through instant access and flexibility. There are significant cost benefits too, moving from a hardware based business to a subscription based business means your IT costs are predictable no matter how your business needs to grow or contract. With a simple price per user based service when you bring in a new member of staff you already know what you're annual IT cost will be for them.

The advances in internet speeds and hosting technology through virtualisation have made Hosted Desktop a real option for improving your business performance, while reducing costs giving improved returns on your IT investment.
